

PEST CONTROL FORMULATION AND DISPENSER

ABSTRACT

5 The present invention relates to a pest control system which includes a pest control active ingredient and isodiphenyl phosphate as a carrier for the active ingredient. The system releases the active ingredient efficiently and uniformly. The pest control system is less irritating to the animal's skin as compared to prior art systems. The system is useful for making animal collars, ear tags, pest strips, liquid spot-on treatments, and the like.
